WORK EXPERIENCE:

Stormbreach

March 2022 - Present

Systems Developer

California

- Coordinated with a group to develop a functional prototype open world MMORPG in Unreal Engine with the intent to be presented to a publisher for further funding.
- Created and developed the movement, ability, interactions and camera system for the character (game mechanics), aided in UI/UX development, programming and world building.

McDonald's

January 2014 - July 2018

Crew Member

San Bernardino, California

- Earned experience with handling money, taking food orders and assembling food for customers.

EDUCATION:

University of California, Irvine

August 2018 - June 2021

Bachelor of Science (B.S.) - Computer Game Science

Irvine, California

- Graduated with a 3.678/4.0 GPA.
- Strong background in programming primarily focused on Python, C++, and C# with specialization in Human Computer Interaction, which emphasizes the software development lifecycles and Agile methodologies to create user-centric experiences.
- Capstone project collaborated with four other peers to design a video game in the Unity game engine. Adobe Photoshop, Blender and GitHub were used to create the capstone project. Other coursework taught prototyping and wire framing (Sketch & Figma) experience for User Interface (UI) and User Experience (UX) design.

San Bernardino Valley College

February 2013 - May 2018

Associate's Degree - Liberal Arts

San Bernardino, California
